main_config 1

Index 2

main_config	<i>Config file utilized by main</i>
-------------	-------------------------------------

Description

This function provides the main with all emission factors, and similar user-edited input data as well as options for which sectors to run and, when applicable, which variations to run.

Usage

```
main_config()
```

Details

This function is intended to be the location for all user edited variables other than inputs to the main 'CH4_inventory_build' function.

Value

Nothing is returned from the function. It is run in 'CH4_inventory_build' so that all user-edited settings are utilized throughout.
